

Security Management 80% of all email is spam and spam is the #1 vector for delivering a virus to a machine. We ensure your anti-virus software is doing its job

A La Carte Options

Not-a-Geek maintains a broad service catalogue of features that can be selected in you're A La Carte program. The most common include;

Vulnerability Assessment Detailed analysis of your technology and network to identify any potential risks and to offer guidance to ensure your business is not exposed to external threats and that any applicable compliance requirements are being met.

Managed Anti Virus Total desktop and server security solution including anti-virus, anti-malware and hosted intrusion detection.

Managed Anti Spam 80% of all viruses are delivered via e-mail. This service offers perimeter protection preventing unwanted email and spam from reaching your network or users.

Managed Backup Ensure business continuity through scheduled backup of critical data and restoration in the event of data loss. Apply industry best practices for the protection of your data against loss through regular on-site backup.

Managed Replication An off site replication of your data provides an additional layer of protection in the event of a disaster at your site. Critical data and restore information is housed in our secure data centre.

Managed Audit Meet security, audit and regulatory compliance requirements. Regular audits provide you with periodic assessments of your network vulnerability, compliance and configuration status.

Managed Services

Focus on your business - Not your technology

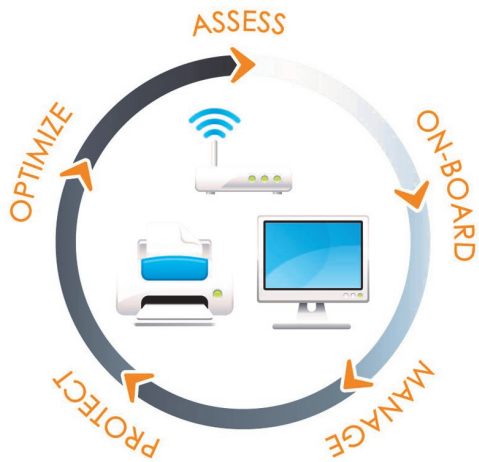

A La Carte Package

Solutions for real world IT problems

Like all businesses, you depend on your technology. But you don't want to end up spending more time dealing with everyday technology problems than running your business. The disruption caused by a hard drive failure or the time taken to remove a virus from a PC can rapidly consume your business day.

Your technology needs to be as flexible as your business, so **Not-a-Geek** have developed our À la carte technology support program.

Device Lifecycle Management

The À la carte program allows you to customise your support and service needs directly related to your critical business services, all at a cost effective price.

Our À la carte offering allows you to select individual services that meet specific needs within your business. Simply work with us to determine what services are critical to your business, and we'll ensure that you have a solution tailored to your needs. You know your business better than anyone, so we put the decision and purchasing power in your hands!

Our enterprise-class technology support and monitoring capabilities empower us to dramatically reduce the time it takes to diagnose and resolve network problems or failures. This translates into increased employee productivity and cost savings for you. In some cases, problems can be avoided before they even happen.

Do these issues plague your business?

Wasted time? Do your staff productivity levels drop dramatically during technology outages, interruptions or failures?

Security fears? Worried that vulnerable servers, laptops or PCs may be putting your organisation or company data at risk?

Lost data? What would be the impact of a hardware failure if a laptop was stolen and critical business data was lost?

Network neglected? Is yours perceived as a "necessary evil" and not as integral to improving business performance?

Regulatory pressures? Do you have to demonstrate compliance or provide audit data?

Program Advantages

Safe and protected computing environment We can ensure patches and antivirus updates for your PCs have been installed, prevent spam from reaching your network reducing the likelihood of your network being compromised.

Business continuity Data back up services provide peace-of-mind knowing all critical business and customer data can be quickly restored.

Lets you focus on your business We can be your technology watchdog, enabling you to focus on your core business activities instead of managing your technology and worrying about its associated failures.

Fewer emergency calls and network issues With our services, you'll see a dramatic reduction in the number of emergency and network incidents that can impact your business operations.

Program Features

Flexible & Customised solutions allow you to select and combine only the services that meet the specific needs of your business.

Vulnerability Assessment provides detailed analysis of your IT infrastructure to identify potential areas of vulnerability and to help with mitigation and protection.
