Managed Services

Focus on your business - Not your technology

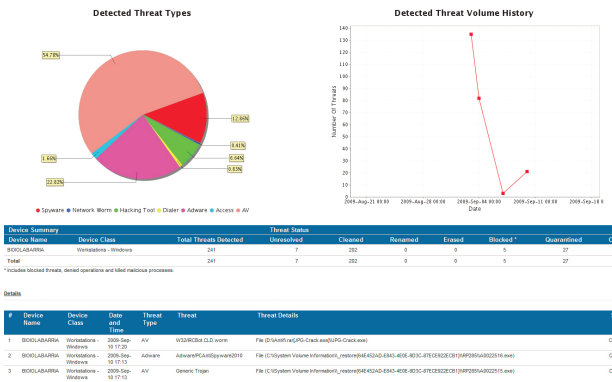

Endpoint Security

What is worse than a Virus?

Time and money wasted recovering from one!

Every minute counts in today's business. Stop wasting your valuable and scarce technology resource time and energy on the selection, testing, planning, deployment, updating and reporting of your Anti-virus software.

The **managed endpoint security solution** offered by **Not-a-Geek** is a comprehensive monitored and managed security service which provides the skilled technology resources, domain expertise, centralised monitoring and management facilities and proactive approach to ensuring the protection of your technology against the ever present threat of viruses, spam and malware attacks.

Key Features

Enterprise Class Solution

Encompassing more than just anti-virus, this solution supports full endpoint security

Most Advance Proactive Technology

Comprised of intrusion prevention, proactive detection and behavioural analysis

Anti-Spam for Desktops

Based on recurrent pattern detection, content agnostic technology that detects and blocks spam in any language

Software Firewall

Allows laptops outside of the network to be fully protected

Fully Monitored System

Not-a-Geek will monitor your technology 24x7 to ensure it is always working, has the latest virus protection and will act immediately if there is an issue

Comprehensive Reporting Provides Transparency

A wide range of detailed reports are provided monthly to ensure you have visibility of what is happening and that you are being constantly protected

Benefits of a Managed Security Solution

Fully Managed for the same price as your anti-virus software!

We include enterprise class endpoint software, monitoring 24x7 managed by a team of technical experts that will provide you with regular reports to ensure you can see the devices in your business are protected at all times!

Reduce operating costs

A security incident can stop you from being 100% productive at work. This costs the company a lot of money in lost productivity and in opportunity costs. A virus can hit many machines and may take weeks to eradicate. Removing this risk will save you money!

Protect your company's critical assets and information

Proactive technologies ensure an additional protection layer against all types of unknown malware, targeted attacks and Internet threats.

A flexible security solution

Our advanced security features offer the appropriate security for any size of company and network.

Comprehensive reporting

No longer will you be unsure of how well you are protected. We will provide you with reports monthly that let you know that you are safe!

Total peace of mind

Buying a security solution, installing it, and then relying on everyone to keep it updated is a worry. Now you can rest assured that all your servers, PC's and laptops are always protected and that there are a group of dedicated experts taking care of it for you 24x7.

Why Choose Managed Endpoint Security from Not-a-Geek?
